EDUCATION

San Jose State University

San Jose, CA

Bachelor of Science in Computer Science

Expected: May 2028

- **Relevant Coursework:** Data Structures and Algorithms, Discrete Mathematics, Calculus I
- **Activities:** Software and Computer Engineering Society, MESA

EXPERIENCE

Software and Computer Engineering Society (SCE)

December 2025 – February 2026

Software Engineering Intern

San Jose, CA

- Built a real-time stock analysis platform with React and Express.js, integrating Finnhub API for live market data
- Collaborated with developers to design and log market data in a clean formatted table
- Improved maintainability and performance by applying clean architecture principles and consistent coding practices
- Shipped a redesigned UI with data visuals, boosting engagement by 25% and session time from 2 to 5 minutes

PROJECTS

WellisCareAI | *Node.js, Express, watsonx, LangGraph*

- Built an AI chatbot using IBM WatsonX, part of the IBM SkillsLab program, to support health-related user queries
- Engineered prompt pipelines to improve response accuracy and consistency across LLM-generated outputs
- Designed a transparent user interface that helped users better understand AI-generated responses
- Earned a score of **4.25/5** in IBM SkillsLab: Enterprise-ready AI Coded Solutions

FluxCareAI | *React Native (Expo), MongoDB, Python, FastAPI*

- Developed a mobile application to help users analyze processed food products, ingredients, and nutrition details
- Implemented a multi-agent architecture for product analysis using object-based processing and research retrieval
- Designed standardized JSON outputs to support structured communication between AI agents
- Structured a MongoDB database to store analysis results and improve responsiveness of the mobile interface

CodeSentinel | *Next.js, FastAPI, Python, LangChain*

- **Won the Cybersecurity Track at SCE Hacks 1.0** for building an AI-assisted vulnerability scanner
- Developed a system that scans source code for vulnerabilities using OWASP Top 10 security guidelines
- Integrated Gemini 1.5 Flash with LangChain to support communication between code-analysis agents
- Built a responsive Next.js interface for displaying vulnerability findings and reports

Naturis Filter | *AI for Sustainability Research Project*

- **Winner of the 2024 CED X Hackathon** for proposing a sugarcane-based water filtration startup concept
- Applied AI concepts to evaluate the filtration efficiency and sustainability potential of sugarcane waste
- Designed a biodegradable alternative to plastic-based water filtration systems
- Presented feasibility and scalability analysis to judges, demonstrating technical and environmental impact

SKILLS

Languages: Java, Python, JavaScript, HTML/CSS

Frameworks & Libraries: React, React Native (Expo), Node.js, Express, Next.js, FastAPI, LangChain, LangGraph

AI & Machine Learning: IBM watsonx, Prompt Engineering, Multi-Agent Systems, LLM Orchestration

Databases: MongoDB

Developer Tools: Git, VS Code, PyCharm
